Join the Connected and Automated Driving Network

The Connected and Automated Driving (CAD) initiative fosters the cooperation of stakeholders from all sectors involved to build a comprehensive understanding of CAD Research & Innovation (R&I) needs.

Get engaged in the CAD Network

- **Exchange** knowledge and best practice with other members from the industry, research, user communities, members states and policy makers
- **Build** synergies amongst R&I programmes on autonomous driving at national, European and international levels
- **Define** a common approach to development, testing and deployment of CAD in Europe and beyond
